_Airport/src/Reader.h

```
graph BT; A["/Users/BrunoDrumond  
/Documents/GitHub/AED  
_Airport/src/Reader.h"] --> B["/Users/BrunoDrumond  
/Documents/GitHub/AED  
_Airport/src/Reader.cpp"]; A --> C["/Users/BrunoDrumond  
/Documents/GitHub/AED  
_Airport/src/main.cpp"];
```

The diagram illustrates a file dependency structure. At the top is a gray box containing the path to a header file: /Users/BrunoDrumond/Documents/GitHub/AED_Airport/src/Reader.h. Below this box are two white boxes. The left box contains the path to a source file: /Users/BrunoDrumond/Documents/GitHub/AED_Airport/src/Reader.cpp. The right box contains the path to another source file: /Users/BrunoDrumond/Documents/GitHub/AED_Airport/src/main.cpp. Two blue arrows point from the bottom of the left and right boxes to the bottom of the top box, indicating that both source files include the Reader.h header.
