

```
std::hash< Airline  
>::operator()
```

```
graph LR; A["std::hash< Airline  
>::operator()"] --> B["Airline::getCode"]
```

A diagram illustrating a mapping between a C++ hash function and a member function. On the left, a gray rectangular box contains the text `std::hash< Airline` followed by `>::operator()` on the next line. A blue arrow points from the right side of this box to the right side of a white rectangular box on the right. The white box contains the text `Airline::getCode`.

```
Airline::getCode
```
